

SCALE MODEL / PHOTOGRAPHY

The river in miniature

A photographic study of the physical Tbilisi Waterfront model.

SCALE MODEL / PHOTOGRAPHY

Read the masterplan

The physical model reveals the relationship between neighbourhoods, waterways, streets and landscape. Follow the sequence from the district to its smallest residential clusters.

01

The river corridor

03

Streets & courtyards

05

Community spaces

02

Waterfront buildings

04

Residential clusters

06

Villas & gardens

The waterfront district

The bridge, river frontage and the arrangement of buildings.

Along the river

A second perspective through the waterfront neighbourhood.

The neighbourhood fabric

Buildings, streets and planted courtyards seen together.

The waterfront edge

A closer view of the relationship between architecture and water.

Blocks and courtyards

The model at the scale of an individual neighbourhood.

The landscape corridor

The transition between the residential clusters and green spaces.

The lower-rise neighbourhood

A closer study of streets, houses and gardens.

Garden neighbourhoods

Low-rise clusters set within the landscape.

Community spaces

The relationship between larger buildings and surrounding housing.

Villas in detail

Individual homes, garden edges and the local street.
